

## PowerSwipe™

Sleek, rugged, and form fit, the PowerSwipe™ easily attaches to select internet-enabled mobile phones, transforming the phone into a powerful business tool. The PowerSwipe™ is able to quickly read, triple des-encrypt, and securely transmit the information from the magnetic stripe of a card to Creditel's MTX™ for transaction processing. Utilizing the PowerPay™ application (a Java application that resides on the phone), merchants of all sizes are now able to accept payments in the field electronically.

## See the Benefits

**Provide a better buying experience**

Have you ever had the experience where a field person using the voice channel of a two-way radio called in your credit card information to the home office for processing, while you waited patiently for an approval? Have you ever wondered

how many others might have picked up on the information and are busy trying for an approval as well? Providing for a better buying experience, The PowerSwipe provides you with a fast and secure method of accepting payments from your customers in the field, without compromising their personal information.
